

Thirst is not a good early sign of dehydration. By the time a child feels thirsty, he or she may already be dehydrated.

That's why kids should start drinking before thirst develops and consume additional fluids even after thirst is quenched. © KidsHealth

• Fixtures and optional extras •

21st Century Floorstanding Mains Fed Dispenser

Features and Options

- Market leading 11 litre cold water tank
- Drainage option
- Spring loaded taps
- LED display
- Sturdy design developed for use in the educational sector
- Noiseless compressor
- World leading filtration

Cooling System

11L capacity
 Rated Watts: 115
 Temperature control: By compressor

Specifications

Model: CP-2200
 Weight: 30kg
 Rated Voltage: 100,110~220V/50,60Hz
 Colour: White

Dimensions

340mm(W)
 360mm(D)
 1120mm(H)
